HSS Systems has a unique workflow management tool call the "Super Bill" concept that places all of the key information in a single easy to use format that enables the provider see all critical information regarding a client and their appointment. It is also used to record provider/patient information, get the information into the system for a patient receipt of service, and generate a reminder of their next appointment.

Integrated Billing

HSS Systems Human Service Software is designed as a fully integrated solution to an organizations needs for Client and Fiscal Management in a single software suite. The software provides for the capture of billing information close to the point of service in a logical, efficient workflow.

Once the information is captured, the software suite provides for external reporting and billing in an integrated fashion.

The system supports all external reporting requirements, guaranteed. Billing is easy and accurate. Re-billings, automated posting of electronic remittances and tight integration with the Accounts Receivable and General Ledger ensure that the cash flow is managed and maximized.

With the ability of the system to track authorizations, co-pays, contractual allowances, and an un-limited number of insurance plans and third party payers, the HSS Systems Human Service Software is a solid financial base upon which to build your organization. With more than 20 years of experience in the Human Service field, HSS Systems Human Service Software has developed a very vigorous "Business Logic" to make Clinical and Fiscal management an integrated approach.

The HSS Systems approach is designed to provide you with a fixed price proposal for everything that you need. No extras to be purchased, or additions that were not covered, our proposals include all training, all hardware, all software, all custom fit and special considerations, and all existing data conversion. The cost of ownership is always predictable. HSS Systems provides at no additional cost under our maintenance agreement any changes required for external reporting, and any updates for existing purchased modules. This makes yearly budgeting of system related costs straightforward.

The basic electronic and paper billing abilities of the system include:

MA	Medicare
UB04	CMS 1500
POMS, ROCS, DARTS, and other state specific billing and reporting	Client Statement
HL7 (Hospital)	Generic Insurance Statements
Special (e.g. CCBH / Value)	HIPAA 835 / 837
