

Your Hands are Full, Let Us Handle Medication Management.

Medication History, Medication Adherence and E-Prescribing for Practices

Empower Your Practice with Rcopia® from DrFirst

Rcopia is the leading stand-alone medication management solution for those who want all the advantages of integrated medication history, medication adherence and e-prescribing software but don't want to commit to an EMR/EHR system.

The first-ever standalone e-prescribing solution endorsed by the AMA, Rcopia gives providers a better clinical view of the patient and can save a practice \$15,000 annually by eliminating administrative tasks otherwise required of staff.

Rcopia is ranked #1 by Black Book Rankings and can help you and your staff improve efficiency, enhance patient safety and retain existing workflows supported by your PMS or other practice systems.

Be Confident When it Counts

- Access 24 months of patient medication history, current formulary information, and drug-drug/drug-allergy interaction alerts
- Identify and guide patients at-risk for medication non-adherence with cutting-edge tools and resources in our Patient AdvisorSM toolbar
- Securely write and send electronic prescriptions for legend drugs to any pharmacy from any desktop, laptop or mobile device
- Electronically prescribe controlled substances (schedule II-V) in one workflow with our EPCS GoldSM 2.0 add-on
- Eliminate pharmacy phone calls regarding prescription clarifications and refills
- Seamlessly order labs and radiology within the e-prescribing workflow

Your hands have more important things to do. Let us help you work smarter and safer with Rcopia.
